DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 25-30 in the reply filed on 06/09/06 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25-30 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 25, there is lack of proper antecedent basis for the limitation "the fixed weight".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-30 are finally rejected under 35 U.S.C. 102(e) as being anticipated by Tyler (US Patent 6,569,025).

The device of Tyler reads on the claimed limitations in figures 11 and 12 (note, figures 11 and 12 is the combination of embodiments 7-10 and fig. 1—col. 6, lines 54-56) including a wheel (18a), a weight (combination of 88 and 42b), a shaft (92), a main weight (88; It should be noted that the weight chamber carries a combination of weight as seen in the figures noted above.), an upper portion (80), a first motor (45a; col. 6, par. 2-5), a side-drive assembly (col. 6, par. 3-5), a swing arm (118; It should be noted that Examiner has taken the broadest reasonable interpretation of the word “swing¹”), a vertical slot (fig. 10, the slot formed by the weight 42) and a bearing including an inner layer (110) and outer layer (112). It should be noted that the inner layer and an outer layer can rotate relative to each other since weight 42b will move along the shaft 92—col. 6, lines 63-67). Further, the main weight is fixed to the shaft and the adjustable weight is coupled to the fixed weight via 94.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
